QURBANI GUIDE

Essential Qurbani Tips

Inspect Before Buying

Always check the animal's health, teeth, and hooves. A healthy animal should be active, have clear eyes, and proper coat condition.

Know the Right Weight

For Qurbani, cows should ideally be 200kg+, goats and sheep 25kg+. Weight determines the meat yield and cost value.

Check Age Requirements

Cows must be at least 2 years old, goats/sheep at least 1 year. Verify with a vet certificate for authentic purchases.
